

The image is a screenshot of a Windows 95 desktop. The primary window is a Notepad application, titled "EAST- (0335806.wpd)", which contains a list of patent entries. Each entry is preceded by a number in parentheses and followed by a series of patent numbers in quotes, separated by vertical bars. The entries include details such as "trunk and 446/\$.ccls.", "vehicle or automobile", "window with hang\$4", and "Automobile window sill". To the right of the Notepad window is a smaller window titled "USPAT.US\$G\$PLT Data", which appears to be a database or search interface. At the bottom of the screen, a table is visible, listing patent information with columns for "U", "I", "Document ID", "Issue Dat", "Pages", "Title", "Current OR", "Current XR", "Retrieval", "Inventor", and a series of checkboxes and a "U" column. The table contains several rows of data, including patent numbers like 20020017045, 20040129, 19990406, 19971014, 19910716, and 19890221, along with titles like "Electronic illuminated house sign", "Arm support for vehicle", "Automobile garment", "Portable garment hanger", "Vehicle interior", and "Automobile window sill". The desktop background is a standard Windows 95 wallpaper, and the taskbar at the bottom shows the "Start" button and several open applications.
